HP 9000 Series Servers (PA-RISC 64bit) & HP Itanium Servers The following patches should be applied to the base OS: BUNDLE11i(B.. There may be known operational issues with older firmware and BIOS levels and, in these cases, a customer working with the IBM Support center may be directed to upgrade a component to a recommended level.. 23 Support Tools Bundle, QPKAPPS B 072 Applications Patches for HP-UX 11i v2, QPKBASE B.. This page combines the previously separate Software and Hardware support matrices.. Abstract The documents titled Supported Hardware List and Recommended Software

---

Levels provide the operating systems, Host adapters, SAN fabric elements, RAID controllers and selected other hardware that have been tested or qualified by IBM.. \* EOL - (End of Life): Where interoperability items have gone end of life (out of support) and are no longer supported by the vendor either generally or by extended service contact IBM will continue to support the environment on a best can do basis.. This includes such applications as Oracle, HP Virtual Connect, etc Note: \* The levels shown in italic text indicate previously recommended levels.. Where issues occur which are deemed by IBM support to be directly related to items which are no longer generally supported by the vendor IBM may direct customers to upgrade a component to a recommended level.. Only the listed operating systems are supported For host adapters, SAN fabric elements and RAID controllers, we list our currently recommended firmware and/or BIOS levels and formally support only the hardware listed. 34bbb28f04 [Ix Developer Download Full Version](#)
